Selected Projects

[\[Live\]](#) MovieFlix - TMDB API

Tech Stack: React JS, Tailwind CSS.

- Developed a responsive movie application utilizing React.js and Tailwind CSS, providing users with an intuitive interface for browsing trending movies and TV shows.
- Integrated the TMDB API to fetch real-time data, allowing users to search for specific movies and access detailed information such as ratings, reviews, and trailers.
- Implemented sorting functionality to enhance user experience, enabling users to easily filter and explore content based on various criteria like popularity, release date, and genre.

[\[Live\]](#) FurnIt- Ecommerce App

Tech Stack: React JS, Tailwind CSS.

- Developed a frontend e-commerce application using React.js and Tailwind CSS, crafting a visually appealing and intuitive interface for showcasing furniture products.
- Implemented cart functionality, allowing users to add items to their cart directly from the product listings, enhancing the shopping experience and facilitating easy purchase management.
- Ensured responsiveness across devices by employing responsive design principles, enabling seamless navigation and interaction for users accessing the platform from different devices and screen sizes.

[\[Live\]](#) Rapid Compiler - Online Compiler

Tech Stack: React JS, Tailwind CSS.

- Orchestrated the development of a cutting-edge online compiler platform utilizing React.js, offering support for over 96 programming languages, showcasing a robust understanding of frontend technologies and integration capabilities.
- Engineered a responsive and user-friendly interface with intuitive search functionality, allowing users to seamlessly compile code in their preferred programming language, fostering a dynamic and efficient coding environment.
- Leveraged modern design principles to craft a visually stunning user interface, demonstrating a keen eye for aesthetics and a commitment to delivering exceptional user experiences in a diverse and rapidly evolving technological landscape.

Skills

Programming Languages

JavaScript (ES2015 +), C++, HTML, CSS.

Libraries & Frameworks

React, Tailwind CSS, Shadcn, Framer Motion.

Tools & Platforms

Git, GitHub, Netlify, Vercel, Vs Code.

Education

NCBA&E University

Bachelor in Computer Science | Currently in
2nd Year | Dec 2022 to Present

Interests

Web development, Gaming, Cricket, Professional Wrestling, fantasy novels and self-improvement.
